Welcome to

First Impressions

Prenatal Ultrasound

The technology of 3d and 4d Ultrasound has truly changed the ultrasound experience into something you can understand.

At **First Impressions**, the session is designed for your enjoyment unlike any other ultrasound experience you've ever had.

Our intent is to have you leave with an even stronger bond with your baby, with your family, and with the miracle of birth.

Fathers and family and even friends are welcome to come and share this experience with you, and to help increase their bonding experience as well.

When you look at our before and after pictures, you'll be convinced that you can see what your baby looks like before you can hold him or her in your arms.

Our Guarantee

Using the same safe ultrasound waves used in other ultrasound procedures, our 3D and 4D equipment provides a beautiful view of your baby. When you schedule your session between your 28th and 32nd week, we guarantee a face view of your child or you may return at no additional charge.

We also provide a copy of your ultrasound and a limited diagnostic report to your healthcare provider (at your request) and can determine gender if you haven't recieved that information yet, or are looking for confirmation.

Are you pregnant?

First Impressions Prenatal Ultrasound meets the needs of expectant parents and overburdened providers by providing limited diagnostic ultrasounds, and the very popular 3D/4D elective limited diagnostic ultrasounds. We believe our specialized imaging provides an extention to the wonderful care they currently recieve from you, their provider. Our cozy, family-friendly environment puts patients at ease, and solidifies the bond between the expectant family and the unborn baby.

- The bonding that takes place during these amazing services has been studied and proven to have psycho-social benefit for expectant women, as viewing their ultrasounds have resulted in numerous benefits, from smoking cessation to improved diet. References to these studies are available on request. For your convenience these images are also reviewed by our health care clinician, simply to verify the precision of the
